

WEEKLY REPORT and MEETING AGENDA

Report #: 11 Project Name: Resol
Date: 04/27/2022 Prepared by: Anu Khatri

Agenda for the weekly meeting

1. Discuss presentation draft -
https://www.canva.com/design/DAE_CHtNzqs/SPvfWrl0348SqfvvWIMHVA/view?utm_content=DAE_CHtNzqs&utm_campaign=designshare&utm_medium=link2&utm_source=sharebutton

Accomplishments during this period

1. Connected pricing/transaction modules with UI so that transactions can be made from UI
2. Added about page to UI
3. Added transaction information to UI while trading, and functionality to start/stop button
4. Solved issue of getting data for the analytics page to show a graph of the transactions and money made
5. Refined final trading strategy

Plans for next period

1. Refine final presentation
2. Finish final report
3. Get materials ready for check out

Project management status

1. Schedule and milestones - hitting all goals
2. Teamwork - team is working well together with even distribution of work is and making progress
3. Purchases - \$9/month RPC node

Minutes from previous meeting

1. Refined the strategy
8/14 transactions successful - made \$0.012
See what makes those 8 successful and what they have in common
2. Identify which slippage is unreliable
Fails when slippage exceeds than quoted, not because it's not profitable
3. Orca & Raydium are the 2 reliable exchanges where the transaction will follow through
Tried UXP, but didn't really work
4. Higher amounts are not necessarily equaling higher profits
Possibly take out the "too good to be true" check
5. Tried multiple terminals at once, but because it's a public RPC node, it said too many requests and would time out
QuickNode - private RPC node
6. Pricing on public node
Transactions on private node
7. Successful Demo
 - Give 1 minute transaction time and see if can do about 10 transactions
 - Show monitoring and then open up solscan to show the transactions
 - Make some charts of past data of the last week of transactions since harder to show during the demo since so short
 - Talk about lessons learned
 - What is the best idea of your trading strategy - show the key insights from what you learned in the process
 - What is our advantage and what makes our arbitrage better than others - we got some atomicity going (before were losing a lot more)
8. Add information about the team on the website
